the papers presented in this volume range from proposals for new design approaches historical analysis of the relationship between the practice of landscape architecture and environmentalism to the theories of early practitioners of landscape architecture imbued by an environmentalist outlook the issues above are addressed through topics as eclectic as the design of american zoos the establishment of the tennessee valley authority road design and maintenance in texas and criticism of relationships between the words and works of select landscape architects this volume provides a fresh approach to encounters between environmentalism and landscape architecture by reframing the issues through self reflection instead of strategic debate

there is no escaping landscape it's everywhere and part of everyone's life landscapes have received much less attention in aesthetics than those arts we can choose to ignore such as painting or music but they can tell us a lot about the ethical and aesthetic values of the societies that produce them drawing on examples from a wide range of landscapes from around the world and throughout history susan herrington considers the ways landscapes can affect our emotions our imaginations and our understanding of the passage of time on landscapes reveals the design work involved in even the most naturalistic of landscapes and the ways in which contemporary landscapes are turning the challenges of the industrial past into opportunities for the future inviting us to thoughtfully see and experience the landscapes that we encounter in our daily lives on landscapes demonstrates that art is all around us

among those who have investigated the matter there is a clear consensus that theory has been neglected in landscape aesthetics there has been a vast amount of research in the field but that research has not been unified by any comprehensive theory instead the various research efforts either are atheoretical or reflect fragmented and apparently incompatible theoretical foundations in the aesthetics of landscape steven c bourassa responds to this situation by providing a comprehensive theoretical framework for research in landscape aesthetics the book commences with two philosophical chapters which contain critical reviews of the history of ideas about landscape and aesthetic experience then the author presents a tripartite paradigm which combines biological cultural and personal aspects of aesthetic experience in a unified framework he then reviews the literature on each of the three aspects of aesthetic experience finally the theory is applied to practical problems of landscape evaluation and design with particular emphasis on the question of postmodernism an essential book both for members of the design professions and academics interested in the history philosophy and practice of landscape

phenomenology materiality cybernetics palimpsest cyborgs landscape urbanism typology semiotics deconstruction the minefield of theoretical ideas that students must navigate today can be utterly confusing and how do these theories translate to the design studio landscape theory in design introduces theoretical ideas to students without the use of jargon or an assumption of extensive knowledge in other fields and in doing so links these ideas to the processes of design in five thematic chapters susan herrington explains the theoretic groundings of the theory of philosophy why it matters to design an example of the theory in a work of landscape architecture from the twentieth and twenty first centuries debates surrounding the theory particularly as they elaborate modern and postmodern thought and primary readings that can be read as companions to her text an extensive glossary of theoretical terms also adds a vital contribution to students comprehension of theories relevant to the design of landscapes and gardens covering the design of over 40 landscape architects architects and designers in 111 distinct projects from 20 different countries landscape theory in design is essential reading for any student of the landscape

outstanding explorations of design concepts principles and processes this second edition of introduction to landscape design offers even broader coverage of the environmental human technological and aesthetic issues associated with landscape design than the first edition beginning with the way we perceive manage and design the landscape it moves on to explore the forces that influence land design an overview of landscape management planning and design includes a discussion of the roles and integration of the professions involved modes of professional practice and site scale design processes the book explores the ecology of design and the integration of land design decisions into dynamic systems this fully updated new edition presents landscape design as a synergism of art and science addresses the interplay between buildings and sites provides insights into the breadth of people environment relationships places special emphasis on our growing understanding of interrelationships between the landscape and human decisions a superb introduction for students as well as a useful reference for practicing professionals this book is an excellent guide for anyone who wants to develop a better understanding of landscape design

critical regionalism is a place based approach to landscape architecture architecture and planning that emphasizes and embraces combining local and regional influences natural and cultural into the design and planning process in such a world view emphasis is placed on design responses to the vernacular and ecological characteristics of a region while respecting other historic and contemporary influences hopman carefully explains how and why this regionalist approach is invaluable to creating viable and sustainable landscapes and buildings architects and designers are shown the effectiveness of a resilient and continuously adaptive design methodology a methodology that acknowledges both regional and global traditions and celebrates the creativity of individual designs that anchor the past with the present hopman pays special attention to the importance of creating aesthetic experiences when designing a new landscape or built environment experiential aesthetics can guide and inform the designer in implementing regionalist ideas how the experience of a place is reflected in cultural values personal creativity and the poetics and ecological tributes of the natural environment where we live and work creative regionalism is shown to be an effective way to design for the modern age in creative regionalism hopman highlights the best regionalist thinking by landscape architects architects planners and educators during the last century and hopman's historical and theoretical expositions are grounded with real examples scores of twentieth and twenty first century designs from around the world that hopman has carefully studied and critiqued he further explores the regionalist ideas of well known living designers with interviews reviews of the literature philosophical inquiry and reflection as a practicing landscape architect himself with three decades of studying testing and applying the concepts of critical regionalism into innovative landscape designs

planting design is rather obviously a complex topic spanning as it does art science social need and morality especially during these days of increasing planetary environmental threat although certainly not denying the importance of scientifically appropriate practices the symposium the aesthetics of contemporary planting design addressed planting design today proposing a renewed concern for the cultural and aesthetic aspects of the landscapes that result this book which has been developed from the original presentations at the symposium presents the thoughts of a select international group of landscape architects and historians who discuss the subject of planting design through the lens of their own work as well as the work of others both contemporary and historical they suggest that as in real estate the most important factor in selecting plants is location location location certainly the californian situation is far more forgiving than the aridity and other restrictive environmental conditions endemic to the sonoran desert or the frost and short growing seasons of nordic lands that direct scandinavian landscape architects to rely on native birches pines rowan and moss most of us would agree that there are plants sensible for each climatic zone addressing environmental conditions is but the first step in the equation however there are also the issues of combination and composition
